T10449
probable serine/threonine-specific protein kinase (EC 2.7.1.-) - cucumber
probable serine/threonine-specific protein kinase
(;Species: Cucumis sativus (cucumber)
C;Species: Cucumis sativus (cucumber)
C;Accession: T10449
R;Gumpel, N.J.
submitted to the EMBL Data Library, December 1996
A;Reference number: Z17020
A;Accession: T10449
A;Accession: T10449
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: mRNA
A;Residues: 1-504 <GUM>
A;Cross-references: UNIPROT:P93113; EMBL:Y10036
A;Experimental source: cv. Masterpiece; cotyledon
C;Function: Catalyzes the formation of peptidyl-serine-phosphate or peptidyl-threonin
C;Superfamily; AMP-accivated protein kinase; protein kinase homology
C;Keywords: ATP; phosphotransferase; serine/threonine-specific protein kinase
F;6-260/Domain: protein kinase homology <KIN>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Best I

```
serine/threonine-specific protein kinase (EC 2.7.1.-)
NyAlternate names: SNF1 protein kinase omolog AKINI1
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 24-Oct-2000 #sequence_revision 24-Oct-2000 #tc
C;Accession: T52633
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               R.Bhalerao, R.P.; Salchert, K.; Bako, L.; Okresz, L.; Szabados, L.; Proc.
